EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Linda J. Shapiro (Reg. No. 28,264) on 11/22/2004.

The application has been amended as follows:

In the first sentence of the application as amended in the preliminary amendment filed on 12/9/2003, --, now Pat. No. 6,725,072-- was inserted after "December 29, 2000".

In claim 9, line 2, " $(1 - \alpha_{O1}/\alpha_{O2})$ " was changed to $-(1 - \alpha_{O1}/\alpha_{O2})-$.

2. The following is an examiner's statement of reasons for allowance. U.S. Patent 6,353,750 to Kimura et al. (Kimura) teaches a sensor for measuring hematocrit and hemoglobin concentration (Figs. 1 and 12 of Kimura), means for placing the sensor on the skin (Fig. 2 of Kimura), and means for measuring the location of a vein by using a ratio of the intensity of detected light of a first wavelength to a baseline (Fig. 12 of Kimura). U.S. Patent 5,386,819 to Kaneko et al. (Kaneko) teaches a means for locating veins or organs by using the intensity of light transmitted through a living body. (Fig. 36 and column 14, lines 5-47 of Kaneko). U.S. Patent 5,986,770 to Hein et al. (Hein) teaches of a means for imaging blood vessels by measuring the intensity of light. (Fig. 7 of Hein). Kimura, Kaneko, and Hein do not teach a device for locating the flow of fluid in

a graft or vein, as set forth in the claims, that includes a means for measuring a reference ratio between optical attenuation coefficients.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inventorship

3. In view of the papers filed 7/9/2004, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by addition of Louis L. Barrett.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.
